Coolant Hoses Connections Engine Ls3 | forum.minddesk

There are a couple of solutions for bleeding air out of a cooling system. The first is to use the upper radiator hose to fill the engine. This allows the coolant to fill the engine from the top down, helping to force the air out. Once the upper hose overflows, connect it to the radiator and fill the remainder of the radiator.

LS SWAPS: Accessory Drives and Cooling System Guide

Radiator Hose Location. On an LS engine, both radiator hoses route from the passenger's side of the engine. The accessories can interfere with connecting the upper radiator for certain engines and setups for folks who want to run a stock first- or second-generation F-Body radiator or in applications where a turbo or supercharger has been added.

"This radiator has the correct size hose connections for a LSX motor and has the correct steam vent port for LSX swaps. ... Once you run the engine and coolant has circulated the engine, there's no air in the system. I run a OEM LS3 tube on mine, I route the hose under the top radiator hose to conceal it. However I get the try to make it ...

LS3 steam vent routing - Pro-Touring.com

Once the upper mounts and the radiator hoses are removed, tilt back and lift it out—and while I've done this job alone, it's much, much easier to do it with two people to safely ease the radiator out. This is what you'll see once it's gone. With the radiator out, it's time to make quick work of everything else in the engine compartment.

Updating the Cooling System for LS Power | CC Tech

Hey guys, I know a lot of you are running LS power and I need some help solving my heat issue. My engine is new (bored and stroked LS3, 418 cu.in.), and only has 250 miles on it. The first 200 miles it never went above 210 but lately it's been hitting 230 on my gauge. I swapped out the factory style thermostat for a MR Gasket brand 180 which states the engine will run cooler.
