Wikipedia

An LFA is a management tool for effective planning and implementation of developmental projects. It provides clear, concise and systematic information about a project through a framework. We know about various components of a project such as goal, objectives, activities, results and indicators. The LFA helps in connecting all these components in one framework, presenting the tight relationship between them, leading to the achievement of the expected outcomes.

What is Logical Framework Analysis (LFA) and why is it ...

A logical framework matrix (or logframe) is the output of a program design process where you work out how the program activities will lead to the immediate outputs, and how these will lead to the outcomes and goal. In an ideal world, a logframe should be flexible and updated frequently. Unfortunately, these days most donors
