What Is A Case Study
In the social and life sciences, a case study is a research method involving an up-close, in-depth, and detailed examination of a particular case. For example, a case study in medicine may examine a specific patient a doctor treated, and a case study in business might study a particular firm's strategy.

Case study - Wikipedia
A case study is a detailed study of a specific subject, such as a person, group, place, event, organization, or phenomenon. Case studies are commonly used in social, educational, clinical, and business research. A case study research design usually involves qualitative methods, but quantitative methods are sometimes also used.

How to Do a Case Study | Examples and Methods
Definition of case study. 1 : an intensive analysis of an individual unit (such as a person or community) stressing developmental factors in relation to environment. 2 : case history.

Case Study | Definition of Case Study by Merriam-Webster
A case study is a research strategy and an empirical inquiry that investigates a phenomenon within its real-life context. Case studies are based on an in-depth investigation of a single individual, group or event to explore the causes of underlying principles. A case study is a descriptive and exploratory analysis of a person, group or event.

Definition of Case Study - PressAcademia
Case studies are the case in education process that most often makes students seek immediate help. No pun intended but the task is one of the most challenging because it gets really close to real life situations and so requires more work than just paraphrasing textbook ideas.

Case Study: Basic Guide for Students (with Examples)
What is a Case Study? A business case study is simply a story about how you successfully delivered a solution to your client. Case studies start with background information about the customer, describe problems they were facing, present the solutions you developed, and explain how those solutions positively impacted the customer's business.

How to Write a Case Study: Step-by-Step Guide (+ Examples)
Definition In the social sciences, the term case study refers to both a method of analysis and a specific research design for examining a problem, both of which can be used to generalize findings across populations. This tab focuses on the latter--how to design and organize a research paper that analyzes a specific case.

Writing a Case Study - Organizing Your Social Sciences ...
Case studies are in-depth investigations of a single person, group, event or community. Typically, data are gathered from a variety of sources and by using several different methods (e.g. observations & interviews). The case study research method originated in clinical medicine (the case history, i.e. the patient's personal history).

Online Writing: What is case study in qualitative research ...
The case study method is two-parted. One part is the case itself, and other part is the discussion of the case. Case studies are chosen for teaching based on how rich the narrative is, and whether the people in the study are required to make a decision or solve a problem. When using case studies, the focus is not on the data or the analysis.

What Exactly is a Case Study? | UniversalClass
There is no one definition of case study research. 1 However, very simply... 'a case study can be defined as an intensive study about a person, a group of people or a unit, which is aimed to generalize over several units'. 1 A case study has also been described as an intensive, systematic investigation of a single individual, group, community or some other unit in which the researcher examines in-depth data relating to several variables. 2

What is a case study? | Evidence-Based Nursing
The study of a person, a small group, a single situation, or a specific "case," is called a case study. It involves extensive research, including documented evidence of a particular issue or situation -- symptoms, reactions, affects of certain stimuli, and the conclusion reached following the study.

What is a Case Study? (with pictures) - wiseGEEK
An intrinsic case study is the study of a case wherein the subject itself is the primary interest. The "Genie" case is an example of this. The study wasn't so much about psychology, but about Genie herself, and how her experiences shaped who she was. Genie is the topic.
